Dear [REDACTED],

**The Marine Works (Environmental Impact Assessment) Regulations 2007, as amended ("the Regulations")  
Request for a screening opinion - Colonnades to Coastguards (C2C). Works to include new taller sea wall between two breakwaters incorporating a wider taller public walkway, reconstructed station platform, new station accessible passenger footbridge and new pedestrian access to beach.**

Thank you for your application dated 02 March 2020, requesting a formal screening opinion from the Marine Management Organisation (MMO) in respect to the Coastguards to Colonnades coastal resilience works.

## Background

It is our normal procedure to consider such applications in compliance with our obligations under the Regulations.

In considering these Regulations, the MMO must determine whether the works envisaged are a project listed in Schedule A1 (for which an Environmental Impact Assessment (EIA) is mandatory) or a Schedule A2 project within the Directive.

If the works are determined to be a Schedule A2 project, consideration should be given to the nature of the project, having regard to its size, the scope of the works and its location. This will assess the potential for it to have a significant effect on the environment and take account of a range of factors including, the materials to be used; the likelihood that the works could bring about short or longer-term changes to marine environment, natural process or interactions with existing activities; the generation of wastes or release of pollutants and cumulative effects.

On reviewing the information you supplied, I am of the opinion that the works proposed would NOT require an EIA under the Regulations. Please see the attached document for the MMO screening opinion.
